

## QGIS Application - Bug report #7722

### Core plugins showing "?" instead of their version number.

2013-04-26 08:17 AM - Paolo Cavallini

| <b>Crashes QGIS or corrupts data:</b>  | No                | <b>Copied to github as #:</b> 16630 |
| <b>Description</b>   |                   |                                     |
| The plugins installed by default do not show their version number in the plugin manager, showing a question mark instead |                   |                                     |

#### History

##### #1 - 2013-04-26 10:30 AM - Giovanni Manghi

- Priority changed from Normal to Severe/Regression

is a regression.

##### #2 - 2013-06-06 01:00 AM - Matthias Kuhn

Seems to be fixed with new plugin manager. Please verify and close if appropriate.

##### #3 - 2013-06-06 08:52 AM - Borys Jurgiel

- Resolution set to fixed

- Status changed from Open to Closed

I'm almost sure it was only related to the old installer. Please reopen if I'm wrong.
