

QGIS Application - Bug report #7761

QML file doesn't load SVGs

2013-05-03 07:26 AM - Jonathan Moules

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Symbology	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 16660
Description		
<p>I have a QML file I created with 1.8. It works quite well.</p> <p>However, when I load it with 1.9, the SVG area fill doesn't work.</p> <p>https://issues.qgis.org/wiki/quantum-gis/OS_Styles</p> <p>The actual SVGs and QMLs are in here (topographic area):</p> <p>https://issues.qgis.org/attachments/4789/MasterMap_Style_files_for_QGIS.zip</p> <p>I do have the directory included in options->system->SVG paths, and the svg's themselves do show up in styling options.</p> <p>Using Master weekly 1959182</p>

Ignore me. Somehow I managed to end up with two sets of the same SVG's with slightly different names. Works fine. Sorry.
