

QGIS Application - Bug report #7762

QGIS Crash playing with the style manager

2013-05-03 07:36 AM - Jonathan Moules

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: worksforme
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 16661
Description		
<p>Hi,</p> <p>QGIS crashed when I was playing around with the Style Manager.</p> <p>I opened the help a couple of times (its completely blank!), click the tabs, then closed it with "cancel". I think it was while closing it that it crashed. Cannot reproduced.</p> <p>I don't know what precisely caused it happen, however it did create the attached dump file. Hopefully that will. If not, just close the call.</p> <p>Master Weekly 1959182</p>

Can you attach sample data? Please also edit the title of this ticket to something more meaningful/detailed. Cheers!

#2 - 2013-05-07 01:39 AM - Jonathan Moules

I don't believe there was any data loaded. I was just playing around with it.

I appreciate its a pretty useless bug report; I just figured that the dmp file would be useful.

Also I don't think I can change the title. Can't see anywhere I can do it.

#3 - 2013-07-13 03:36 AM - Jürgen Fischer

- Resolution set to worksforme

- Status changed from Feedback to Closed

- Subject changed from QGIS Crash to QGIS Crash playing with the style manager
