Crashes QGIS or corrupts data:		**Copied to github as #:**	16738

Description

Dear QGIS,

I am using QGIS for Malaria Program here in the Philippines and I can say that kudos to you guys as this application is helping save lives!

In the 1.7.0-Wroclaw version of the project, I can display Malaria cases per year in a column in the attribute table. To go from one column (year) to another, I only need to load a saved color ramp once and change the column (year).

In current version of QGIS (1.8.0-Lisboa), I needed to define the color ramp for each year. I tried loading a saved color ramp but it will only return to the specific column (year) and reset once I enter the new column. What I did is to save the color ramp for each year and load it whenever I need to display a specific column.

See the project at this link:https://www.yousendit.com/download/WFJVclVBTXY5eFdybHNUQw

See also the attached screenshots.

What to do? Please help.

History

This would be because the classification changes automatically. It was something that I added a while ago, but it has been requested a few time there it be made a switch. I'll see what can be done.

- Category deleted (Map Composer/Printing)

#3 - 2014-06-22 12:46 AM - Jürgen Fischer

- Category set to Symbology

#4 - 2017-05-01 01:09 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#5 - 2018-03-01 12:24 PM - Giovanni Manghi

- Status changed from Open to Feedback

Please test with a recent QGIS release (2.18 or 3), if the issue/request is still valid change the affected version accordingly, if is fixed/implemented then close the ticket. Thanks!

#6 - 2018-08-16 10:30 AM - Giovanni Manghi

- Status changed from Feedback to Closed

- Description updated

- Resolution set to not reproducable

Closing for lack of feedback.
