

## QGIS Application - Bug report #7907

### Minor oddities with dialog "Configure shortcuts"

2013-05-26 05:23 AM - Kai Borgolte

<b>Status:</b>	Closed	
<b>Priority:</b>	Low

<b>Description</b>  1. Enter key Trying to call the dialog "Configure shortcuts" with keyboard: Alt - invoke menu s - _S_ettings down down down - Choose menu entry enter - "click"  The last keystroke "enter" seems not to be eaten by the system, but processed by the dialog. So the dialog immediately closes (standard action: Close). This doesn't happen for example with the Options dialog, so it has to be something special with Configure shortcuts.  2. The first action (first line) of the dialog is empty - possibly an indexing error?		

#### Associated revisions

Revision 0f132602 - 2013-05-26 06:57 PM - Jürgen Fischer

fix #7907

#### History

#1 - 2013-05-26 08:36 AM - Kai Borgolte

Regarding 2:

The empty line seems to originate from fTools plugin.
