QGIS Application - Bug report #7909
Compile error - grass plugin

2013-05-26 08:40 AM - Loïc BARTOLETTI

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Build/Install			
Affected QGIS version:	1.8.0	**Regression?:**	No	
Operating System:	FreeBSD	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	16781	

Description

To build grass plugin (All versions : 1.8.0 and master), FreeBSD needs to include utempter and linking with ulog.

You will find attached a patch correcting the file kpty.cpp and CMakeLists.txt

- File fbsd.diff added

does this patch work for and does it include all necessary changes for FreeBSD?

#2 - 2013-05-27 01:46 PM - Loïc BARTOLETTI

Hello,

I just tested your patch and it works perfectly. Thank you.

The last proble for FreeBSD is with the globe's plugin. unfortunately why I still have errors, I will open another ticket for it.
