QGIS Application - Bug report #7913
Crash on WFS auth fail

2013-05-27 12:09 AM - Chris Berkhout

Status:	Closed			
Priority:	Severe/Regression			
Assignee:				
Category:	Web Services clients/WFS			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:	Mac, maybe others	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	16785	

Description

QGIS version: edge (commit d68524bfd774b6b2fd91f49d914bf18e3ae7c22f). Tried this in 1.8.0 and it didn't crash.

Adding a WFS layer, where authentication is required and unsuccessful (403), an error dialog is shown with "Host requires authentication" (screenshot: https://www.evernote.com/shard/s282/sh/f9016e96-b0f3-4a91-b516-15bf64af63a5/956d1f55071e9bc48f2bbfb7e7b098fa) and after clicking "OK", QGIS crashes.

OSX crash log: https://gist.github.com/chrisberkhout/011728d91868e19e012a

Priority=Blocker since it's "a regression from a previous QGIS version".

Revision ce925496 - 2013-05-31 11:10 AM - Marco Hugentobler

Merge pull request #623 from biolds/master

Fix crash when authentication fails. Fix #7913

History

#1 - 2013-05-29 08:45 AM - Laurent Defert

- File 0001-Fix-crash-when-authentication-fails.-Fix-7913.patch added

The patch in attachement fixes this issue for me.

#2 - 2013-05-29 11:56 AM - Giovanni Manghi

- Pull Request or Patch supplied changed from No to Yes

- Status changed from Open to Feedback

Hi! thanks for the patch! Would you be available to make a GitHub pull request? Otherwise patches here on the track can be "lost" for a while. On Github the pull request will be received by all core developers that then can review it and commit it.
Cheer!

#3 - 2013-05-30 03:03 AM - Laurent Defert

Done. Thanks.

#4 - 2013-05-31 02:10 AM - Marco Hugentobler

- Status changed from Feedback to Closed

Fixed in changeset commit:"ce925496c03009056978a8b343e4c7a5237973d5".
