- Target version set to Version 2.0.0
- Priority changed from Normal to Severe/Regression
- Subject changed from "Create WFS connection" dialog is different from "modify WFS connection" to Ignore GetMap/GetFeatureInfo options disappeared from Create/Modify WFS connection dialogs

This is true on QGIS 1.8, in QGIS master those options do not show at all in either dialogs. It seems strange to me that this was done on purpose, but I may be wrong. If it is a bug then is a blocker. I will ask the developers.

Yes, I got mixed up with the versions. Sorry, 1.8.0 has the disappearing fields, master has just no ignore options in WFS (and WFS has a lot of options).

It does seem strange though, would be good to get the developers' intention confirmed.

WFS doesn't have GetMap and GetFeatureInfo, so there's nothing to ignore anyway.
