

## QGIS Application - Feature request #796

### Vertex-level editing

2007-11-08 02:40 PM - John Tull

<b>Status:</b> Closed	
<b>Priority:</b> Low	
<b>Assignee:</b> nobody -	
<b>Category:</b> Digitising	
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> duplicate
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 10855
<b>Description</b>	
<p>Ability to use editing tools on multiple vertices at a time. For instance, the delete vertex tool would be able to draw a rectangle around a selection of vertices within a polygon, line, or series of points and delete them all at once. Optionally, a selection on a subset of vertices could be made with the selection tool, then the move vertex tool could move the selected set of vertices on click and drag.</p>

Hi John

Isn't this a duplicate of your #748 by any chance?

#### #2 - 2008-02-22 10:12 AM - John Tull

- Resolution set to duplicate

- Status changed from Open to Closed
