

QGIS Application - Bug report #7965

qgis server master no longer serve rasters in certain CRS

2013-06-01 04:33 PM - Giovanni Manghi

Status:	Closed	
Priority:	Severe/Regression	
Assignee:	Radim Blazek	
Category:	QGIS Server	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 16824
Description		
examples attached		
the raster in epsg 3763 is not published, its copy in wgs84 it is.		

History

#1 - 2013-06-04 03:44 AM - Radim Blazek

- Resolution set to invalid
- Assignee set to Radim Blazek
- Status changed from Open to Closed

The raster3763.tif in your example does not have read permission for group/others and GDAL fails to open it on server.

Please be a bit more careful filling new issues, it takes time trying to fix a bug which does not exist.

Radim I really feel that this comment is too strong and unfair. I filed almost 700 tickets, almost all bugs and almost all right.

This make me feel stop testing QGIS as I really think that the hundreds of of hours of my free time I spent (since 2009) testing (on both Linux and Windows, always) the program are really not appreciated.

Sorry, I did not want to offend you.

I appreciate a lot the work you are doing, both filling new bugs and verifying old bugs as I already told you more times.
