

QGIS Application - Bug report #7968

change the message "The feature cannot be added because it's geometry collapsed due to intersection avoidance" as is misleading in some cases

2013-06-02 02:18 AM - Giovanni Manghi

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Digitising	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: end of life
Crashes QGIS or corrupts data:		Copied to github as #: 16827
Description		
<p>The above message shows not only when a feature cannot be digitized because it would be removed because of the "avoid intersection" option.</p> <p>It shows also when digitizing a polygon adjacent to another one that has errors. This message is very misleading in this cases. The user should be warned that the polygon cannot be digitized because the one being used to "clip" the overlapped part has errors.</p>		

History

Should misleading phrasing be a blocker at this stage?

#2 - 2013-06-03 12:25 AM - Giovanni Manghi

- Priority changed from Severe/Regression to High
