

QGIS Application - Feature request #7974

add zoom controls for map object in composer (other than mouse wheel)

2013-06-02 12:20 PM - Aren Cambre

Status:	Closed	
Priority:	Normal	
Assignee:	Nyall Dawson	
Category:	Map Composer/Printing	
Pull Request or Patch supplied:		Resolution: fixed/implemented
Easy fix?:	No	Copied to github as #: 16831
Description		
<p>The zoom in/out buttons in print composer only currently allow zooming on the entire canvas. They don't help a user adjust an individual content item.</p> <p>It appears the only way you can zoom in or out in individual content in Print Composer is to go to <b>Item Properties</b> and manually change the <b>Scale</b> field. Please provide some way to use the mouse to zoom in and out of individual content items, such as a map item.</p>

the mouse wheel zoom the map object in print composer, does not work for you?

#2 - 2013-06-02 12:43 PM - Aren Cambre

Just tried it, and it's really imprecise if you're not using a device that has a physical wheel, like if you're using a laptop trackpad.

Also, I think that mouse wheel generally complements or duplicates features available elsewhere in the UI. Not so in this case.

you may want to change the title in something like "add zoom controls for map object in composer", just a suggestion.

I am fine with that new title, but I don't see how to change it.

- *Target version changed from Version 2.0.0 to Future Release - High Priority*

**#8 - 2014-04-06 06:04 AM - Jürgen Fischer**

- *Category changed from 33 to Map Composer/Printing*

**#9 - 2014-09-19 07:50 PM - Nyal Dawson**

- *Resolution set to fixed/implemented*

- *Status changed from Feedback to Closed*

This is all implemented in current master - holding ctrl while zooming using the mouse wheel results in a finer zoom. Please open new requests if there's any other features missing from this report.
