

## QGIS Application - Bug report #8039

### Customization doesn't work in dialog windows

2013-06-11 09:29 AM - Borys Jurgiel

<b>Status:</b>	Closed	
<b>Priority:</b>	Severe/Regression	
<b>Assignee:</b>		
<b>Category:</b>	Customisation Framework	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>	Debian	<b>Easy fix?:</b> No
<b>Pull Request or Patch applied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 16882
<b>Description</b>		
Disabling dialog elements doesn't take any effect. I assume it's a regression, please downgrade if it was already broken in 1.8.

Most probably because resources/customization.xml is not updated. I tried with QgsAbout > tabWidget > Widget2 > txtVersion and it works.

Try again once we manage to update customization.xml.

**#2 - 2013-06-12 10:06 AM - Borys Jurgiel**

It doesn't work for me. I only tested a few dialog windows (none is working) and a few main window toolbar buttons (they all are ok).

**#3 - 2013-06-12 12:06 PM - Radim Blazek**

I have updated customisation.xml.

No idea why it does not work for you, here it seems to work. Can you give one exact example (full path to widget from customisation dialog)?

**#4 - 2013-06-12 12:29 PM - Borys Jurgiel**

I got it. It's because of translation. When QGIS is localized, only menus and toolbars work. No dialog, no panel, no status bar element.

But if I run it with --lang=blahblah (fallback to English), I have to disable elements once again (it seems strings change), and then everything works.
