

QGIS Application - Bug report #8047

gdaltool's input / output file selector broken following SIP upgrade

2013-06-12 06:31 PM - Mathieu Pellerin - nIRV

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	GDAL Tools	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 16889
Description		
Steps to reproduce (with input): 1. Open gdaltool's merge dialog (Raster > Miscellaneous > Merge) 2. Click on the Input files' Select button 3. Choose any raster file (a single file is fine to expose bug) and click on the Open button 4. QGIS then throws an error box saying: Traceback (most recent call last): File "C:/OSGeo4W/apps/qgis-dev/.python/plugins\\GdalTools\\tools\\doMerge.py", line 91, in fillInputFilesEdit if files.isEmpty(): AttributeError: 'list' object has no attribute 'isEmpty' Steps to reproduce (with output): 1. Open gdaltool's merge dialog (Raster > Miscellaneous > Merge) 2. Click on the Output files' Select button 3. Type in a dummy raster name (i.e. crash_me.tif) and click on the Save button 4. QGIS then throws an error box saying: Traceback (most recent call last): File "C:/OSGeo4W/apps/qgis-dev/.python/plugins\\GdalTools\\tools\\doMerge.py", line 123, in fillOutputFileEdit if outputFile.isEmpty(): AttributeError: 'unicode' object has no attribute 'isEmpty'
