

QGIS Application - Bug report #8077

Heatmap plugin doesn't release file after it's created

2013-06-16 09:41 AM - Aren Cambre

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Analysis library	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 16916
Description		
<p>I just used the Heatmap plugin to create a heatmap. Per Process Explorer, QGIS retains a lock on the file even when it's done creating the TIF.</p> <p>Expected behavior: All locks are released on created items after they are created or that aren't currently in some kind of edit mode.</p>

Turns out that QGIS in fact opened the heatmap as another layer immediately after creating the heatmap. It just took a long time to get it done and I didn't realize that was in progress.

Still, since QGIS was done writing to the file, the lock should be released so that I may open it in other programs.

#2 - 2014-01-30 11:40 PM - Paolo Cavallini

- Target version changed from Version 2.0.0 to Future Release - High Priority

#3 - 2014-06-29 06:50 AM - Jürgen Fischer

- Category changed from GUI to C++ Plugins

#4 - 2014-06-29 11:27 AM - Jürgen Fischer

- Category changed from C++ Plugins to 114

#5 - 2016-12-20 01:31 AM - Alexander Bruy

- Status changed from Open to Closed

- Operating System deleted (Windows 7 x64)

- Resolution set to fixed/implemented

Should be fixed by recent port to Processing. Please reopen if necessary

#6 - 2017-01-02 01:26 AM - Giovanni Manghi

- Category changed from 114 to Analysis library
