

QGIS Application - Feature request #8078

Heatmap plugin should remember prior run's settings

2013-06-16 10:33 AM - Aren Cambre

Status:	Closed	
Priority:	Normal

Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 16917
Description		
<p>I've had a few situations where I am experimenting with Heatmap plugin settings, progressively refining the settings until I get the map I want. The problem is that the Heatmap dialog does not remember these. Each time I go back, I have to fill everything back out again.</p> <p>It would be nice if the dialog would remember the prior use, or if there was some way I could save a use profile. If this is implemented, it would also need a way to reset back to default settings.</p> <p>(Sorry if this has the wrong category. I used #7624 as a guide. Not sure where Heatmap plugin issues should really go.)</p>
