<b>Description</b>		
<p>Hi,</p> <p>with qgis-dev.</p> <p>The proxy settings of options-&gt;network seem don't be used by plugin manager to retrieve the list.</p> <p>It simply go in timeout.</p> <p>Instead it is recognized and used from other components like for example the Layer WMS provider, that connect and get the maps.</p> <p>If I use a direct internet connection instead the plugin manager retrieve the list.</p>
