

QGIS Application - Feature request #8152

DB Manager: add functions to add triggers for area/perimeter/lentgh (like in the old PostGIS Manager plugin)

Easy fix?:	No	Copied to github as #: 16980
Description		
<p>In the old PostGIS Manager plugin it was possible to add triggers for area/perimeter/length, that was very handy because most of the users basically need just that functions to auto update their tables.</p> <p>It would be nice to have this feature in DB manager.</p>
