

QGIS Application - Bug report #816

"No Data Value" reported as -9999 or -10000 in error

2007-11-18 03:21 AM - Maciej Sieczka -

Status:	Closed	
Priority:	Low	
Assignee:	ersts -	
Category:	Rasters	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 10875
Description		
<p>When [[NoData]] is not present in the raster, QGIS reports -9999 or -10000 for [[NoData]], in error. It took me quite a while to find out it's not about my data only that QGIS is wrong. Please report sth like "No Data Value: not present" instead of throwing an arbitrary, bogus value.</p>		

History

#1 - 2007-12-07 02:33 PM - ersts -

This was partially address in a #806 but the default value when there was not a valid nodatavalue is currently -9999. Since this is not desired a boolean flag will be added and all operations referring to nodatavalue will be wrapped in an if statement.

#2 - 2007-12-30 06:05 PM - ersts -

- Resolution set to fixed

- Status changed from Open to Closed
