

QGIS Application - Bug report #8167

wrong encoding of vector layer opened from command-line or browser

2013-06-26 01:04 AM - Minoru Akagi

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Data Provider	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 16990
Description		
<p>This is an issue that Borys let me know. When I open shapefiles from command-line or browser, the encoding is set to the last used encoding. Then, if the ignore option is unchecked, I cannot change it to UTF-8. The same thing happens with KML files. There seems to be no problem with drag & drop.</p>
