Category:	Python plugins			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	worksforme	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17005	

Description

When I try to install plugins online (via internet) , I get error message and can't install them at all with my Windows PC wthich has a Japanese user name (2byte character).

I experienced this issue with version 1.7.4 and 1.8.

I have not tried with v2.0, because I have already changed my user name from 2byte-Japanese to 1byte letters, but I think it does not work well with the newest version.

- Subject changed from Fail to install pluguins online if Windows' user name is Japanese (2-byte code) to Fail to install plugins online if Windows' user name is Japanese (2-byte code)

#3 - 2013-06-28 12:54 AM - Hiroyuki Kobayashi

please tell me how to confirm my report.

#4 - 2013-06-28 02:54 AM - Minoru Akagi

Install qgis-dev with OSGeo4W Installer, and then run qgis-dev.bat under a user account with Japanese name. You can add a new user account on control panel.

with usernames with characters like ã ê ó ò etc it used to not work on qgis 1.8 but now seems fine on master.
