

QGIS Application - Bug report #8207

Gdal rasterize readthedocs page link broken

2013-07-02 07:02 AM - Simon Dedman

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Documentation and Help	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 17023
Description		
Hopefully a small problem: the manual here: http://qgis.readthedocs.org/en/latest/docs/user_manual/plugins/plugins_gdaltools.html#conversion has a link: http://www.gdal.org/gdal-rasterize.html which is broken. I looked on the gdal site FAQs which gets one here: http://trac.osgeo.org/gdal/wiki/FAQRaster#CanIusegdal_rasterizetogeneratenon-solidpolygons linking to this: http://lists.maptools.org/pipermail/gdal-dev/2006-June/009294.html which is missing. If anyone knows people responsible for these links, please pass this on. If anyone knows where there's documentation on the rasterize plugin, specifically what option one has to select to result in 10x10m raster pixels, please let me know. Thanks Simon

I think it should be http://www.gdal.org/gdal_rasterize.html instead of <http://www.gdal.org/gdal-rasterize.html>

I will fix it in both 1.8 and master
