

QGIS Application - Bug report #8213

Overwriting files when Print>Export to PDF

2013-07-04 09:40 AM - Paolo Cavallini

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 17027
Description		
<p>When exporting from a print template to PDF, resulting files are overwritten without asking. See also #4024</p> <p>Warning: for Atlas, it would be cumbersome to ask users to confirm overwrite for each file, so probably an "overwrite all" option should also be added.</p>		

History

#1 - 2013-07-05 07:59 AM - Daniel Vaz

Here, this bug don't occurs when saving only one file. When the user is using atlas, it is prompted where will the directory that will be saved the exported files. One solution is verify the existence of files which has the same names of the exported layers, and then shows to the user what files will be replaced.

#2 - 2014-04-06 06:04 AM - Jürgen Fischer

- Category changed from 33 to Map Composer/Printing

#3 - 2017-05-01 01:09 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#4 - 2018-02-24 01:40 PM - Paolo Cavallini

- Status changed from Open to Closed

- Description updated

- Resolution set to fixed/implemented

Apparently fixed in QGIS 3
