QGIS Application - Bug report #8214
[Composer] Snap to grid / selection tolerance strange behaviour

2013-07-04 03:06 PM - Hien TRAN-QUANG

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Map Composer/Printing		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:		**Copied to github as #:**	17028

Description

When snap to grid is enabled, changing grid spacing and selection tolerance don't seem to change placement behaviour : selection is always snapped to the grid, even if tolerance is changed.

For instance, with a 50x50 spacing and a tolerance of 5, I believe it should allow to place an item at 20 of a point of the grid.

Associated revisions

Revision d7db4a53 - 2013-09-26 05:22 AM - Nyall Dawson

Add option for grid snap tolerance, move selection tolerance spin box to new section (fix #8214)

History

#1 - 2013-11-19 01:29 AM - Nyall Dawson

- Resolution set to fixed/implemented

- Status changed from Open to Closed

Fix has been in master for some time -- I'm not sure why this didn't auto-close.
