

QGIS Application - Bug report #827

Data entry requires Return, even if another data entry box is clicked

2007-11-22 03:26 PM - gburns -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:		
Affected QGIS version:		Regression?: No
Operating System: OS X		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 10886
Description		
<p>Most software, when you are entering data in one box and then click in a second, a Return is automatically generated which enters the data in the first box. This does not happen in <i>Print Composer</i>. If you do not press Return when entering data in <i>Print Composer</i>, the data is not recognised when you click in another box.</p>
