Description With QGIS 2 built with GDAL 1.10, the "Mask layer" radio button does not display in the Clipper dialog. GDAL 1.10 is failing the the version test in doClipper.py as it thinks 1.10 is older than 1.7. By doing a global search within the GdalTools directory, I was able to identify the following lines of code that need to be updated to recognize GDAL 1.10 version correctly: <pre>/Resources/python/plugins/GdalTools/tools/doBuildVRT.py line 55 (self.srcNoDataSpin, SIGNAL"), self.srcNoDataCheck, "1.7.0"), line 57-58 (self.separateCheck, SIGNAL"), None, "1.7.0"), (self.allowProjDiffCheck, SIGNAL"), None, "1.7.0"), /Resources/python/plugins/GdalTools/tools/doClipper.py line 53-54 (self.noDataSpin, SIGNAL"), self.noDataCheck, "1.7.0"), (self.maskSelector, SIGNAL"), self.maskModeRadio, "1.6.0"), line 171 if Utils.GdalConfig.version() >= "1.8.0": /Resources/python/plugins/GdalTools/tools/doContour.py line 45 self.useDirAsOutput = gdalVersion < "1.7.0" /Resources/python/plugins/GdalTools/tools/doRasterize.py line 97 if gdalVersion >= "1.8.0": line 110 if gdalVersion >= "1.8.0": /Resources/python/plugins/GdalTools/tools/doTileIndex.py line 55-56 (self.absolutePathCheck, SIGNAL"), None, "1.5.0"), (self.skipDifferentProjCheck, SIGNAL"), None, "1.5.0") /Users/rcline/Desktop/GdalTools/tools/doWarp.py (self.maskSelector, SIGNAL"), self.maskCheck, "1.6.0"),</pre>

Functionalities are missing compared to 1.8, so I mark this as a blocker, even if this depends on external software.
