QGIS Application - Bug report #8353
Default Snapping Not Working

2013-07-23 05:46 PM - Damien Smith

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Digitising			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	end of life	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17133	

Description

If I have snapping enabled by default for new layers, it doesn't actually work unless I turn snapping off for that layer and then turn it on again.

History

#1 - 2013-07-23 10:42 PM - Denis Rouzaud

When you add a new layer it takes the current default snapping settings.

So if you change the defaults afterwards, it will only affect new layers, the already loaded layers keeping their current settings.
