QGIS Application - Bug report #8368
Missing EPSG:102067 projection

2013-07-27 11:13 AM - Michal Zimmermann

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Projection Support			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	end of life	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17145	

Description

EPSG:102067 was recently replaced by EPSG:102065 in master version. However, this cannot be used with the Czech WMS servers, as they support just the official national system, which is EPSG:102067. Is it possible to put it back to the list of predefined coordinate systems?

History

#1 - 2014-01-30 11:40 PM - Paolo Cavallini

- Target version changed from Version 2.0.0 to Future Release - High Priority

#2 - 2014-02-07 05:16 AM - Giovanni Manghi

- Priority changed from High to Normal

There is no crash or data corruption, so I'm lowering the priority.

#3 - 2017-05-01 01:09 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#4 - 2019-03-09 04:04 PM - Giovanni Manghi

- Resolution set to end of life

- Status changed from Open to Closed

End of life notice: QGIS 2.18 LTR
