Easy fix?:	No	**Copied to github as #:**	17161

Description

Hi,

I'm lucky enought to be able to do georeferencing on two screens, one is for the main app and the other is for the georeferencer.

The only problem is that it is impossible to prevent the georef window from being reduced when I choose to pick the coordinates on the canevas, making comparison between the two sources null.

Revision 9041950f - 2015-06-21 01:45 PM - Nyall Dawson

[georef] Don't minimise georeferencer when adding points from main
window, just raise the main window instead (fix #8388)
