

QGIS Application - Bug report #8392

Python Console - Autoclosing brackets behavior

2013-08-01 01:14 AM - Matthias Kuhn

Status:	Closed	
Priority:	High	
Assignee:	Salvatore Larosa	
Category:	PyQGIS Console	
Affected QGIS version:	master	Regression?: No
Operating System:	Ubuntu 12.04 LTS	Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 17165
Description		
<p>The python console automatically inserts the closing bracket when you type e.g. for</p> <pre>iface.mapCanvas(</pre> <p>will be expanded automatically to</p> <pre>iface.mapCanvas()</pre> <p>with the cursor placed between the brackets.</p> <p>Therefore I often find myself typing</p> <pre>iface.mapCanvas())</pre> <p>or</p> <pre>iface.mapCanvas().refresh)</pre> <p>And then have either a python error or an extra click onto delete I'd propose to</p> <ul style="list-style-type: none">- either to remove this behavior of auto-inserting brackets- overwrite auto-inserted brackets by manually typed ones (unless e.g. mouse- or arrow-interaction occurred which would "commit" the auto-inserted bracket) <p>Any opinions on this?</p>

You can turn auto insert off in the console settings.

#2 - 2013-08-01 02:41 AM - Matthias Kuhn

I should have checked before... Thanks Nathan.

Any opinions about the second proposal and about changing the default setting value for this to be off?
