

QGIS Application - Bug report #8408

GdalTools: Output format is already GeoTIFF

2013-08-03 08:19 PM - Minoru Akagi

Status:	Closed	
Priority:	Normal

Category:	GDAL Tools	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch applied:	Yes	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 17179
Description Some GdalTools (e.g. translation, warp) generate only GeoTIFF files, because the "-of" option is always set to "GTiff". So we need to directly edit the "-of" option to write into another format. The selected filter in the output file select dialog does not apply to the option. This means that some features of GdalTools are not working well.

"already" in the title is a typo. It should be "always".
