

## QGIS Application - Bug report #8447

### Label \$area and field

2013-08-11 12:59 PM - Lene Fischer

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Labelling	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 17216
<b>Description</b>		
<p>I'm trying to set a label with the function \$area. This works fine. Also with formatting ex 1 decimal.</p> <p>With \$area    'text' the formatting for decimals fails</p>		

### History

#### #1 - 2013-08-11 03:08 PM - Giovanni Manghi

- *Assignee set to Larry Shaffer*

I had once reported the same issue here #6981 and it was closed because in the expression builder there are now number formatting functions. It is up to you to keep this open or closing it for the same reason.

#### #2 - 2013-08-11 03:11 PM - Nathan Woodrow

- *Resolution set to invalid*
- *Status changed from Open to Closed*

The format option doesn't work on anything but pure numbers being returned. Once you use || you are returning a string and we can't format that. Use the format\_number function
