

## QGIS Application - Bug report #8472

### Scalebar unit selection

2013-08-15 06:56 PM - Brylie Oxley

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Map Composer/Printing	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 17240
<b>Description</b>		
<p>As a cartographer</p> <p>I would like to select scale bar units independent of base map units</p> <p>because I need to provide scale bar(s) representing multiple units (e.g. metric and imperial)</p> <p>Scenario 1: base map units in degrees converted to kilometers</p> <p>Given a user has a <b>base map with degrees as units</b></p> <p>And the user has added a <b>scale bar</b> in print composer</p> <p>And the <b>scale bar properties have a unit selection</b> section</p> <p>When the <b>user selects kilometers</b> as the scale bar units</p> <p>Then the <b>scale bar will display the kilometer value</b></p>

- Resolution set to invalid
- Status changed from Open to Closed

In QGIS master aka 2.0 is already possible, you can switch the scalebar units between map units, meters and feet.
