

QGIS Application - Feature request #8535

SAGA Supervised Classification: add option "Get class statistics from"

2013-08-31 03:59 AM - Luca Congedo

Status:	Open	Resolution: Copied to github as #: 17286
Priority:	Normal	
Assignee:	Victor Olaya	
Category:	Processing/SAGA	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>Hello everybody,</p> <p>it would be good (at least for the Semi-Automatic Classification Plugin) to allow for the selection of the statistics source (STATS_SRC) for the supervised classification and the selection of the table containing class statistics (STATS).</p> <p>Maybe something like this:</p> <p>ParameterSelection STATS_SRC Get class statistics from [0] Training Areas [1] Class Table</p> <p>This way the classification process would be rapider because class statistics can be calculated only once, saved in a .txt file, and used for the following classifications.</p> <p>Also, it allows for the classification of image subsets that are outside the extension of training areas.</p> <p>Thank you.</p> <p>Cheers!</p>
