

QGIS Application - Bug report #854

Dont assert for unknown types in QgsVectorFileWriter

2007-12-05 05:11 PM - Tim Sutton

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Build/Install	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 10913

Description

From QGIS Users list:

2007/12/5, alexey <qgis at mail.ru>:

Hi

I have a problem with generating shape file in qgis.
When at grass vector layer I press right mouse button and select "save as shapefile" qgis crashes and in terminal appears this text:

[[QgsGrass]]::vectors()
qgis: /home/timlinux/dev/cpp/qgis-0.9.0/src/core/qgsvectorfilewriter.cpp:222: bo
[[QgsVectorFileWriter]]::addFeature(QgsFeature&): Assertion @0 && "invalid varian
t type" failed.
Aborted

ol

I've addressed this issue in part with the attached patch in that it should fail more gracefully now with a suitable error message describing the nature of the problem and no longer performing an assert. Since we are in string freeze for 0.9.1, I will apply this after the release.

History

#1 - 2007-12-07 05:47 AM - Tim Sutton

- Resolution set to fixed
- Status changed from Open to Closed

Patch applied in .

#2 - 2009-08-22 12:54 AM - Anonymous

Milestone Version 0.9.2 deleted
