

QGIS Application - Feature request #8610

Add the possibility to create several styles for one layer

2013-09-14 02:27 AM - Yves Jacolin

Status:	Closed	Resolution: Copied to github as #: 17351
Priority:	Low	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>one user could create a style for one layer, give it a name and add another one. User can switch from one style to another one among context of the map and change classification on the fly.</p> <p>It will avoid duplicate layer for different classification and will allow WMS GetCapabilities request to publish list of style available for web client.</p> <p>This will impact at least layer style dialog box and legend.</p>

- Status changed from Open to Feedback

have you already explored the feature that allows you to write style for PostGIS layers into the DB, and change them by clicking "load style from db"?

cheers
