**Description**

Subject is self-explanatory. As the number of expression functions and possibilities are increasing, users a bound to create longer expressions (for e.g. conditional case-based expressions). It'd be really useful for the text box to be re sizable via drag and dropping the "Expresion ---------" separator.

**History**

**#1 - 2014-02-16 01:22 AM - Mathieu Pellerin - nIRV**

- *Resolution set to fixed/implemented*

- *Status changed from Open to Closed*
