QGIS Application - Bug report #8631
QGIS 2.01 and 2.1 "Add delimited text layer" not working correctly

2013-09-19 06:51 AM - Rhenriques Henriques

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	C++ Plugins		
Affected QGIS version:	master	**Regression?:**	No
Operating System:	OSX	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	duplicate
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17364

Description

The "Add delimited text layer" is not working correctly in version 2.01 and 2.1. Text is not parsed correctly. Text data that works fine in QGIS 1.8, with values separated by tabs, get messed up in 2.xx. With comma separated values and the problem is the same.

History

#1 - 2013-09-19 07:45 AM - Giovanni Manghi

- Status changed from Open to Feedback

- Target version changed from Version 2.0.0 to Future Release - High Priority

- Category set to C++ Plugins

please add sample data

#2 - 2013-09-19 08:31 AM - Rhenriques Henriques

- File testesuica.txt added

- File testesuica.csv added

Here it goes some sample data in swiss epsg 21781 coordinate system. This data is parsing just fine in QGIS 1.8 but fails in QGIS 2.xx. It's a blocker bug because lots of people use this workflow for spatial data. The files were obtained by exporting an Excel spreadsheet to Tab delimited text and comma delimited text.
Cheers

#3 - 2013-09-20 01:10 AM - Giovanni Manghi

- Resolution set to duplicate

- Status changed from Feedback to Closed

are your files made with excel on osx? if yes then is ultimately a mac issue, I agree that is a regression but there are easy workarounds meanwhile, see

#8421

http://developmentality.wordpress.com/2010/12/06/excel-2008-for-macs-csv-bug/

reopen if necessary.
