Description

Line decoration support was intentionally removed from QGIS. Same thing can be done with a line marker:

If I'm not mistaken the dbmanager topoviewer plugin uses saved styles, for simplicity,
so the fix would be easy. Should be done before next 2.0 release, IMHO, but there's no such Target Version.
Could we get a "Version 2.0.x" target ?

Salvatore: I assigned to you, since you noticed first :>
