

## QGIS Application - Bug report #8647

### Labeling with 'Capitalize first letter' does not work with all Caps

2013-09-22 11:29 PM - Devdatta Tengshe

<b>Status:</b>	Closed

<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 17378
<b>Description</b>		
<p>I have tried this with a shapefile as well as a PostGIS layer. I have a layer with a field which has text in all Caps. For example the text is 'ARUNACHAL PRADESH'</p> <p>When use the the 'Capitalize first letter' in Labels&gt;&gt;Text&gt;&gt;TypeCase, the label which is generated is in all caps. We should get 'Arunchal Pradesh', but the output is 'ARUNACHAL PRADESH'. (Do note that the 'All Lowercase' option works as expected)</p> <p>This bug not happen when the input field is in all small case, or in mixed case.</p>

You can reproduce this with the following GeoJSON:

```
{
  "type" : "FeatureCollection",

  "features" : [{
    "type" : "Feature",
    "id" : 0,
    "properties" : {
      "name" : "FOO BAR",
      "m_name" : "Foo bAr",
      "s_name" : "foo bar"
    },
    "geometry" : {
      "type" : "Point",
      "coordinates" : [20, 50]
    }
  }
]
};
```

Also note that when the input is "Foo bAr", the output with 'Capitalize first letter' is "Foo BAR" and not "Foo Bar" as expected.
