

QGIS Application - Bug report #8667
GDAL WMS raster display issues in 2.0.1

2013-09-25 05:58 AM - Frederick Basson

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Web Services clients/WMS	
Affected QGIS version:	2.0.1	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: worksforme
Crashes QGIS or corrupts data:	No	Copied to github as #: 17396
Description		
<p>The GDAL WMS for this XML link (http://aerial.openstreetmap.org.za/aerial-osm-org-za-tiles.xml) worked perfectly in 1.8.0, but has display issues in 2.0.1 Windows 64 bit version. Some tiles appear to have incomplete 3-band display.</p>		

History

- Resolution set to worksforme
- Status changed from Open to Closed
- File Desktop.zip added

it looks the same to me. How rasters are handled changed a lot in qgis 2.0, you will have to look into raster properties and see that the options are much more, but it is not difficult to find the settings that will render layers as in 1.8. See attached projects. Please reopen if necessary.
