

QGIS Application - Bug report #8691

Inconsistent icons in Processing toolbox

2013-09-26 08:23 AM - Jonathan Moules

Status: Closed	
Priority: Normal	
Assignee: Victor Olaya	
Category: Processing/Core	
Affected QGIS version: 2.0.1	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	Copied to github as #: 17412
Description	
<p>In the Processing toolbox (2.0.1), there is a "Geoalgorithms" which has a cog symbol. There's also model - model symbol. And Script - script symbol. However, when I go into either model or script, the items all have the "cog" symbol. Shouldn't they be respectively model and script symbols as applicable? It's minor, but the discrepancy is incongruous.</p>	
<p>p.s. In the "Category" section of this tracker, there's a blank between "Rasters" and "StyleV2" which I suspect used to be SEXTANTE.</p>	

History

#1 - 2013-09-26 08:31 AM - Alexander Bruy

- Status changed from Open to Rejected
- Resolution set to worksforme

Works fine in master.

#2 - 2013-09-26 08:40 AM - Victor Olaya

- Status changed from Rejected to In Progress

Reopening it. Actually I had noticed that sometime ago, but I didn't fill an issue report

Alex, maybe a problem or resources?

#3 - 2013-09-26 08:43 AM - Jonathan Moules

Just looked into it further - it's not a problem in the "Advanced interface" (not seen that before) - I guess that's what Alexander is using?

This issue happens in the "Simple interface" for me.

#4 - 2013-09-26 08:46 AM - Jonathan Moules

Relatedly - "GDAL" -> "Analysis" -> fillnodata has no icon at all. The others seems fine.

#5 - 2013-09-26 09:20 AM - Alexander Bruy

- Resolution deleted (worksforme)

This is your fault then :-), you have to specify this in first post.

I can confirm this with simplified interface.

Please, post tickets in Processing bugtracker, not in QGIS one. It is hard to track tickets in both redmine instances simultaneously

Please don't mix up different issues in one ticket and search in bugtracker before posting. This issue (with icon) already reported, see #7200

I didn't know there was a processing bugtracker. There is a category for processing (SEXTANTE) on these ones which seemed the logical place to report it. The problem with lots of trackers is, it because a pain for the reporter - there's one for QGIS, one for the website (on github) and now one for the processing thing too.

Sorry about that, it seemed like it might be related/the same thing.

#8 - 2014-11-22 03:02 AM - Alexander Bruy

- Status changed from In Progress to Closed

- Resolution set to fixed/implemented

Fixed in master

#9 - 2015-06-07 04:32 AM - Giovanni Manghi

- Category changed from 94 to Processing/Core
