Still true? Works fine here

#2 - 2014-03-27 02:18 AM - Paolo Cavallini

Cannot test now, as the plugin is currently broken in my installation.

#3 - 2014-05-19 05:50 AM - bnotter -

Still the same problem as described in my QGIS 2.0 installation on 64-bit Windows 7: Shortest path calculation works, but when exporting, temporary layer is empty.

With QGIS 2.2, the plugin cannot even be configured (no line layer can be chosen in the configuration dialog even if one is present in the project).

#4 - 2014-06-16 07:19 AM - Alexander Bruy

- Status changed from Feedback to Closed

Fixed in changeset commit:"d616bf4558feb06c3fb8fb998c8dadb3fe2836b3".

#5 - 2014-06-16 07:23 AM - Alexander Bruy

- Resolution set to fixed/implemented
