

QGIS Application - Bug report #8800

mssql default attribute values not supported by attribute table

2013-10-08 11:27 PM - Jaemes Driver

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Data Provider/MSSQL	
Affected QGIS version:	2.0.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 17501
Description		
It seems that default attribute values (SQL Server table default values) are missing in the QGIS 2.0 attribute table? (they existed in the attribute table as at 1.8) The default values appear (as expected) in the 'Edit feature form' for a newly created features but not in the 'attribute table view'. For example: when a feature is copied from a shapefile then pasted into the SQL Server table the default values are not utilised. QGIS version 2.0.1-Dufour QGIS code revision 34139bc SQL Server 2008 R2 Here's the odbc error received (the same operation works in QGIS 1.8 - <i>Provider errors:</i> <i>[Microsoft][ODBC SQL Server Driver][SQL Server]Cannot insert the value NULL into column 'EDIT_USER', table 'CIMS.cimsadmin.LF_DesignPackage'; column does not allow nulls. INSERT fails. [Microsoft][ODBC SQL Server Driver][SQL Server]The statement has been terminated. QODBC3: Unable to execute statement</i>		

Associated revisions

Revision 174d112d - 2016-06-30 09:53 PM - Jürgen Fischer

- initialize pasted feature with default values (fixes #8800)
- show default values of new features in attribute table and identify results
