QGIS Application - Bug report #8854
Browser not accessing Windows network

2013-10-15 09:09 AM - Paolo Cavallini

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Browser		
Affected QGIS version:	2.0.1	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:		**Copied to github as #:**	17536

Description

The Add vector menu correctly navigates the local network (Windows), whereas the Browser cannot explore inside the content of folder (added as links on the desktop). Apparently, networks cannot be added to the list of items in Browser

History

#1 - 2017-05-01 01:09 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#2 - 2018-02-24 04:07 PM - Paolo Cavallini

(Un)fortunately I have no access to Windows network, so I cannot test on QGIS 3

#3 - 2018-02-24 05:11 PM - Giovanni Manghi

- Resolution set to fixed/implemented

- Status changed from Open to Closed

On recent Windows versions network shares are mapped as a letter drive, and QGIS browser works just fine with them.
