

QGIS Application - Bug report #8860

Overlap of Close/drop down button on "invalid data source"

2013-10-16 12:23 AM - Jonathan Moules

Status:	Closed	
Priority:	Normal	
Assignee:	Larry Shaffer	
Category:	GUI	
Affected QGIS version:	2.0.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 17541
Description		
Per screenshot, the Close" and drop-down menu overlap on the "invalid data source" error. Thus whenever I click the drop-down to see what it's about, it just acts as a immediate "close".		

History

- Assignee set to Larry Shaffer

The drop-down menu has one action, 'Close all,' which closes all message bar notification in the message bar 'stack.' The default for the Close tool button was to show the menu via the [QToolButton::DelayedPopup](#) mode, i.e. you have to press and hold on the button to see the menu.

This has been changed in commit commit:65200e3f. Please verify change (fixing this issue), which now separates the menu button and allows it show the menu on a single click, i.e. uses QToolButton::MenuButtonPopup mode.

- Status changed from Open to Closed

Believe this is fixed. Reopen if necessary.

#3 - 2014-02-24 05:50 AM - Jonathan Moules

Yep, fixed in 2.2.0. Bonus: It now doesn't come up with just one error.

Many thanks! :-)
