Affected QGIS version:	master	Regression?:	No
Operating System:	windows	Easy fix?:	No
Pull Request or Patch supplied:	No	Resolution:	
Crashes QGIS or corrupts data:	No	Copied to github as #:	17567
Description			
Labelling fails for spatialite spatial views in QGIS-Master 2.1.			
Steps to reproduce (also see attached screendump):			
1. Add view3 from attached database to qgis project			
2. Turn on labelling (select field name)			
I guess it is a blocker since it is working fine in QGIS 2.0.
