### Description

Hi, here on windows 7, using qgis 2.0.1-2 64 bits - gdal 1.10, drap and drop a xlsx file can't open datasource.

Opening it with classical ogr dialog does very well.

QGIS 32 bits - gdal 1.9 and xls does work correctly.

Couldn't test xls and gdal 1.10, xks drivers currently missing in osgeo4w. (work in progress)

Cheers

*- Priority changed from High to Normal*

There is no crash or data corruption, so I'm lowering the priority.
