

QGIS Application - Bug report #8965

Images Concatenation in Orfeo Toolbox Failed

2013-10-29 10:36 AM - Dany Laksono

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 17629
Description		
<p>In build 1ef7553, when running Images Concatenation Tool from Orfeo Toolbox > Image Manipulation, the warning message below showed up:</p> <p>Traceback (most recent call last): File "C:/OSGeo4W/apps/qgis-dev/.python/plugins\processing\gui\AlgorithmExecutionDialog.py", line 208, in accept self.setParamValues() File "C:/OSGeo4W/apps/qgis-dev/.python/plugins\processing\gui\AlgorithmExecutionDialog.py", line 143, in setParamValues self.paramTable.valueItems[param.name]): File "C:/OSGeo4W/apps/qgis-dev/.python/plugins\processing\gui\AlgorithmExecutionDialog.py", line 189, in setParamValue value.append(options[index]) TypeError: list indices must be integers, not unicode</p> <p>Works flawlessly on QGIS 2.0.1 Dufour.</p>		

History

#1 - 2013-10-29 10:40 AM - Giovanni Manghi

- Resolution set to invalid
- Status changed from Open to Closed

this was fixed today in master. In the next days processing will be updated (as a standard python plugin) and it will contain also this fix.

#2 - 2013-10-30 01:43 AM - Alexander Bruy

This issue was fixed before uploading Processing to plugins site. So just update it.

And please, post Processing bugs into it's own bugtracker, not to QGIS one.
