

QGIS Application - Bug report #8985

"/" in column name makes symbology fail

2013-11-02 06:57 PM - Rhenriques Henriques

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Symbology	
Affected QGIS version:	master	Regression?: No
Operating System:	Ubuntu 12.04 LTS	Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 17645
Description		
<p>In QGIS 2.1 DEV 47b055f, and the two previous Night Builds, if we use Properties->Stile->Categorized and classify using a field with 0 and 1 values, all points got the color of the default value.</p> <p>Same data shows correctly under version 2.0 or 1.8.</p> <p>Test data attached.</p> <p>Cheers</p>		

History

#1 - 2013-11-03 01:19 AM - Giovanni Manghi

- OS version deleted (10.9)
- Category changed from Expressions to Symbology
- Subject changed from Properties Style Error to "/" in column name makes symbology fail
- Affected QGIS version changed from 2.0.1 to master
- Operating System deleted (OSX Mavericks)

It is the "/" in the column name the origin of the issue.

#2 - 2015-11-29 05:48 AM - Sebastian Dietrich

I can not reproduce using the attached test data. Neither of the following versions shows the error (on Windows):

- 2.6.0
- 2.12.0
- master (commit:5473c3394f688c4d5e9ac3bff82cd1f33a3afea5)

#3 - 2015-11-29 12:09 PM - Nyall Dawson

- Status changed from Open to Closed

Fixed in current versions. Please re-open and post steps to reproduce if you encounter this in 2.12.1
